

REPRESENTED SOFTWARE

SOFTWARE	BRAND	SECTOR	SHORT DESCRIPTION
Access Orchestrator	Zero Networks 	Security	Segmentation of each client and each server, everywhere. Zero Networks automatically takes every resource in your organization and limits network access to only what is needed. Protect any type of asset from anywhere - client, server, home, office, on-premise
Adobe	Adobe Incorporated 	Video and Digital Graphics	Document management software. Video and digital graphics. Software for creating, distributing and optimizing content and applications. Creative Cloud, more than 20 apps for photography, design, video and the web.
ArcGIS	Esri Italia 	Topography	ArcGIS is a geographic information system produced by Esri. It is used for the creation and use of maps, compilation of geographic data; analysis of maps, sharing and management of geographic information in a database.
Aztec software	Aztec Informatica 	Construction Engineering	Aztec Informatica is a software manufacturer for Geotechnical and Structural Engineering. For over twenty-five years it has been making software dedicated to foundations, global stability and structures.
Azure	Microsoft 	Virtualization Environment	Azure Active Directory (Azure AD) Corporate Identity Service provides single sign-on and multi-factor authentication to protect users from 99.9% cybersecurity attacks. Help to protect the identity security landscape.
BowTieXP	CGE Risk Management Solutions 	Risk Assessment	BowTieXP is a next generation of risk assessment tool that uses the Bowtie Method to assess risks. BowTieXP is unique in its ability to visualise complex risks in a way that is understandable.
Breeze Software	Trinity Consultants 	Environmental Engineering	Thousands of environmental professionals use BREEZE software to model the dispersion of air emissions as well as fires and explosions. BREEZE also offers quality-assured meteorological data for a variety of modeling scenarios.

REPRESENTED SOFTWARE

SOFTWARE	BRAND	SECTOR	SHORT DESCRIPTION
Check Point	Check Point Software Technologies 	Security	The Leading Cyber Security Platform. Fueled by AI, the Check Point Infinity platform autonomously predicts and prevents attacks across networks, clouds, endpoints and devices.
Cyme	Eaton 	Electrical Engineering	Robust, comprehensive suite of advanced simulation tools for transmission, distribution and industrial power engineers. Designed to help, it addresses the complex and emerging challenges of the electrical engineers.
ExSILentia	Exida 	Engineering Tools	Solution to offer the groundbreaking 3D Gap Analysis: a comprehensive review of functional safety, alarm management, and cybersecurity lifecycle implementation within your organization or plant.
FlexPDE	PDE Solutions 	Mathematical Modeling	From stress analysis to chemical reaction kinetics, mathematical modeling of real world systems is dominated by partial differential equations. FlexPDE treats the equations rather than the application.
McAfee	McAfee 	Security	McAfee Total Protection. The first cloud-based product family that protects data and stops threats across devices, networks, clouds (IaaS, PaaS, and SaaS), and on-premises environments.
NAPA Design	Napa Ltd 	Construction	3D modeling and design is the most powerful in the industry and make the design process the best it can be. Integrated development and customizable features allow users to automate repetitive tasks and include user-specific ship design know-how into the system.
Octopus	ABB 	Marine	ABB's Marine Software System called OCTOPUS is a unique product portfolio for performance management in marine operations. It reduces fuel consumption and emissions, and increases availability and safety on a vessel.

REPRESENTED SOFTWARE

SOFTWARE	BRAND	SECTOR	SHORT DESCRIPTION
PaloAlto	Palo Alto Networks, Inc. 	Security	Palo Alto Networks is an American multinational cybersecurity. Its core products are a platform that includes advanced firewalls and cloud-based offerings that extend those firewalls to cover other aspects of security with physical or virtual devices.
PenTera	PCYSYS Bludis 	Security	PenTera by PCYSYS is the revolutionary automatic network penetration test platform capable of launching the most sophisticated attacks by simulating hackers. Forge your Cyber Resilience with continuous penetration testing.
PhaWorks	Primatech 	Risk Assessment	PHAWorks® is a specialized tool for conducting Process Hazard Analysis (PHA) studies. The software is designed to allow you to start studies straight out of the box, leading you through each step of data entry.
Phoenics	Cham 	Oil & Gas	PHOENICS is a reliable, cost-effective CFD program with a proven track record that simulates scenarios involving fluid flow, heat or mass transfer, chemical reactions and combustion for a wide range of applications.
PipelineStudio	Energy Solutions International 	Oil & Gas	PipelineStudio is the industry-leading pipeline management design software and engineering solution that combines graphical configuration and reporting tools with industry-proven simulation engines.
PVTsim	Calsep A/S 	Oil & Gas	PVTsim is a simulation program for reservoir engineering and flow control specialists. PVTsim starts from the chemical composition of the oil and allows to calculate the optimal condition in which to extract, transfer or store the oil, minimizing the paraffin production.
Ramp	Atkins Global 	Simulation	Simulation software to evaluate the reliability, availability, maintainability and productivity of complex systems that would otherwise be too difficult and expensive to study analytically.

REPRESENTED SOFTWARE

SOFTWARE	BRAND	SECTOR	SHORT DESCRIPTION
RISC	GroundwaterSoftware 	Risk Assessment	It's the new standard for Human Health Risk Assessment for Contaminate Sites. A unique feature of RISC is its ability to perform a backward risk calculation as well as the conventional forward risk calculation.
ScrewDrivers	Tricerat 	Tools	It is a universal print driver software platform that works for all printers, including those in a remote environment. Tricerat has created a unique printing protocol that accelerates remote printing and improves performance.
spBeam - spColumn	StructurePoint 	Costruction Engineering	spBeam features torsion effects in the shear design and investigation allowing engineers to achieve more economical cross sections where coupled shear and torsion occur (in accordance with US codes).
Surfer	Golden Software 	Geology	Surfer is a software for contour and 3D surface graphics. Surfer, easily converts data into contour maps and surface textures. The scattered data is transformed into grid graphs used to produce contours and maps.
Toad for Oracle	Quest Software Inc 	Tools	Toad for Oracle is a comprehensive database tool for development and administration. Only Toad combines the deepest functionality available with extensive automation and intuitive workflows.
Total Metals	Key to Metals 	Materials Engineering	Total Metals is the most comprehensive metals database in the world. Advanced resources for material properties, including stress-strain curves, fatigue data, and more. Ownership data for thousands of non-metallic materials.
Thron Platform	THRON S.p.a. 	Tools	DAM and PIM. in a single platform. Software for managing data for each product and all the contents that represent it. In THRON PLATFORM you centralize any process: from creation to publication, through collaboration and analysis.

REPRESENTED SOFTWARE

SOFTWARE	BRAND	SECTOR	SHORT DESCRIPTION
ViMP	ViMP 	Tools	ViMP is a high value video content management system allowing you to run your own video portal. It is also excellently suited for video on demand portals, e-learning platforms and internal corporate video solutions.
VMware	VMware 	Virtualization	VMware offers a breadth of digital solutions that powers apps, services, and experiences which enable organizations to deliver the best customer service and empower employees. It allows you to virtualize and move servers and applications.
WeldOffice	C-Spec 	Construction Engineering	Automatically creates and manages multi-code, multi-process qualified welding procedure specifications and offers code compliance and code rules verification supported by active code committee members.
X1 Product Suite	X1 Discovery 	Tools	X1 Search™ provides users the simplest way to find and work with the information they need and thought they'd never find again. Immediate access to documents and emails.
XMLSpy	Altova 	Software Development	Altova® is specializing in tools that assist developers with data management, application development, mobile, and data integration. XMLSpy is a XML and JSON editor for designing, editing, and debugging enterprise-class applications.
Zoom	Zoom Video Communications 	Videoconference Tool	Flexible solutions for modern team collaboration. A single platform to connect and innovate.
